The Time of Revolt

2021-11-30

as capitalism triumphs on the ruins of utopias and faith in progress fades revolts are breaking out everywhere from london to hong kong and from buenos aires to beirut protests flare up in some cases spreading like wildfire in other cases petering out and reigniting elsewhere not even the pandemic has been able to stop them as many were reflecting on the loss of public space the fuse of a fresh explosion was lit in minneapolis with the brutal murder of george floyd we are living in an age of revolt but what is revolt it would be a mistake to think of it as simply an explosion of anger a spontaneous and irrational outburst as it is often portrayed in the media exploding anger is not a bolt from the blue but a symptom of a social order in which the sovereignty of the state has imposed itself as the sole condition of order revolt challenges the sovereignty of the state whether it is democratic or despotic exposing the violence that underpins it revolt upsets the agenda of power interrupts time throws history into disarray the time of revolt discontinuous and intermittent is also a revolt of time an anarchic transition to a space of time that disengages itself from the architecture of politics this brilliant reflection on the nature and significance of revolt will be of interest to students of politics and philosophy and to anyone concerned with the key questions of politics today

this historic book may have numerous typos and missing text purchasers can usually download a free scanned copy of the original book without typos from the publisher not indexed not illustrated 1907 edition excerpt b the control of structure in vegetable life biological lore is full of the transformation of structures to serve various purposes and this adaptability is seen more convincingly perhaps in vegetables than animals no better example can be found than

in the various duties performed by the stipules of leaves those little winged appendages that are so often seen where the leaf springs from the main stem they are by no means always present and often appear to serve no particular purpose in the rose they look like little teeth in the beech the lime the elm they are represented by the brown scales that protect the young shoots and fall away as soon as the leaves have broken through them in the edible pea where most of the leaves change into tendrils wherewith to seize support from stronger neighbours the stipules become enormously enlarged so that they are actually more important than the leaves themselves in the plant s economy in the sweet pea they are not so big because the true leaves are relatively larger on the other hand in the red berried bryony the stipules become tendrils to climb into neighbouring hedges in the common dock and rhubarb they unite by both margins and form a tube that protects the young leai in the hop the stipules of opposite leaves unite ami split down their centre thus forming the brown scales that lie between the leaves indeed we cannot by any means always understand the adaptations of structures especially when the only purpose served is that of symmetry and colour but for that matter it has yet to be shown that beauty is not a function in developmental needs and that mutual service between species if only in awakening the emotions of delight and wonder in man is not a large factor in

a well written and thought provoking account of the current crisis of globalization not everyone will agree with eyal s interpretation but few will remain indifferent yuval noah harari author of sapiens revolt is an eloquent and provocative challenge to the prevailing wisdom about the rise of nationalism and populism today with a vibrant and informed voice nadav eyal illustrates how modern globalization is unsustainable he contends that the collapse of the current world order is not so much about the imbalance between technological advances and social progress or the breakdown of liberal democracy as it is about a passion to upend and destroy power structures that have become hollow corrupt or simply unresponsive to urgent needs eyal illuminates the forces both benign and malignant that have so rapidly transformed our economic political and cultural realities shedding light not only on the globalized revolution that has come to define our time but also on the counterrevolution waged by those who globalization has marginalized and exploited with a mixture of journalistic narrative penetrating vignettes and original analysis revolt shows that within the mainstream the left and right have much in common teasing out the connections among distressed pennsylvania coal miners anarchists in communes on the outskirts of athens neo nazis in germany and syrian refugee families whom he accompanied from the shores of greece to their destination in germany eyal shows how their stories feed our current state of unrest more than just an analysis of the present though revolt also takes a hard look at lessons from the past from the opium wars in china to colonialist haiti to the marshall plan with these historical ties eyal shows that the roots of revolt have always been deep and strong the current uprisings are no passing phenomenon revolt is the new status quo
